

## NEW SYSTEM IMPLEMENTATION PROGRAM | Training and Support

Accuray's New System Implementation Program for the CyberKnife® Robotic Radiosurgery System is designed to empower you to deliver the highest quality treatments to your patients. A comprehensive, integrated series of education and support services, the New System Implementation Program will prepare your institution to launch your CyberKnife System and drive its growth and success. Through a partnership of training and support, Accuray cares for you so that you can care for your patients.

### COMPREHENSIVE SERVICES

- Structured and well-defined training and support services strategically timed to coincide with key installation milestones
- Dedicated professional personnel to help you successfully manage the New System Implementation project
- Closely integrated training events build strong technical and theoretical foundations
- Continued remote support from a team of system experts

### TEAM FOCUSED TRAINING

**Training the Core Team.** CyberKnife® Education is built around a Core Team that consists of:

- Radiation Oncologist
- Clinical Medical Physicist
- Radiation Therapist
- Surgical Specialists

Together this team becomes clinical and technical experts and serves as the advocates for your program to oversee its successful launch.

### PROGRAM OVERVIEW

Every CyberKnife System includes the following training and support services:

- Core Training Curriculum develops in-depth product expertise
- Clinical Education ensures a prepared and confident medical team
- Onsite Physics support prepares the physics team and helps ready the system for use
- Extensive Onsite Training during Go Live supports you during patient treatments and ensures a strong launch
- Flexibility to train additional team members
- Ongoing clinical support helps maximize utilization and efficiency

### PRODUCT TRAINING

**Physics Core Curriculum.** Ensuring your physics staff is prepared and well-educated, Accuray's Physics Core Curriculum includes instruction on commissioning, quality assurance, treatment delivery and treatment planning.

**Treatment Planning Core Curriculum.** Immersive training on the planning and delivery systems prepares medical staff to understand the inter-relationship between patient selection, treatment planning, treatment delivery and CyberKnife workflow.

**Treatment Delivery Core Curriculum.** This course offers focused hands-on training in small groups so that therapists become experts at using the CyberKnife System's sophisticated image guidance modalities and at managing the treatment delivery workflow.

### EXPERT CLINICAL EDUCATION

**Advanced Clinical Partnerships.** By partnering with experienced clinical centers around the world, Accuray provides a variety of Clinical Education options for new and experienced CyberKnife users alike. These Clinical Education programs offer clinicians, physicists, and therapists the opportunity to experience the benefits of peer-to-peer expert education from those who know your CyberKnife System best.

### IN-DEPTH ONSITE INSTRUCTION

**Physics and Clinical Readiness Support.** Your educational experience continues with workflow-centered training and support provided by highly trained clinical applications and physics specialists. They are committed to assisting the Clinical Medical Physicists with testing, commissioning, and implementing QA programs prior to patient treatments.

**Go Live and Ongoing Support.** Onsite support for your first patient treatments and return visits are provided to reinforce training and demonstrate our commitment to your success. Our team of specialists will remain accessible by telephone and e-mail throughout your relationship with Accuray.

### TRAINING AND SUPPORT PROGRAM ELEMENTS

The graphic above illustrates the different training and support elements leading to a successful launch. A dedicated facilitator and project manager will help your team navigate through the program and stay on schedule. Mandatory parts of the program are identified with [R] to indicate minimum training requirements.
